

Make a fact file about modern day Egypt. Use the information given, but do not simply copy – you need to write in your own words.

Try to include the following:

- Continent
- Capital city
- Flag
- Language
- Main religion
- Currency
- Physical features eg. Rivers, surrounding seas/countries, mountains, deserts, climate.
- Human features eg. Landmarks, tallest building, population, airports, major cities

If you were to go to Egypt on holiday, what would you like to do?

Could you learn how to count to 10 / say hello and goodbye?

Do more people live in Egypt or the UK? What is the difference?

How much would you get for £1 in Egyptian currency?

An Introduction to Egypt

Where in the world is Egypt?

Egypt is situated in the **northeast corner of the Africa**. Covering 386,662 square miles, it is almost twice the size of France and the twelfth largest country in Africa. To the north of Egypt is the Mediterranean Sea, to the south is the Sudan, to the west is Libya and to the east of Egypt is the Red Sea.

About 95% of Egypt's population live in the Nile valley and the Nile Delta.

Facts about Egypt today

Capital	Cairo (also the largest city)
Population	80,264,543 (2007 estimate)
Area	1,001,450 sq. km (386,662 sq. mi)
Currency	Egyptian Pound
Major Religion	Islam
Languages	Arabic (official), English, French.
Major Cities	Cairo, Alexandria, Giza
Climate	Hot summers and cool winters

How big is Egypt?

It is about 1085 km north to south, and 1255 east to west and its total area is approximately 1,001,450 sq. km (386,662 sq. mi).

How much of Egypt is desert?

More than 90 percent of Egypt consists of desert areas.

The two main deserts in Egypt are:

- the Libyan Desert (also known as the Western Desert) in the west, a part of the Sahara desert
- the Arabian Desert (also called the Eastern Desert), which borders the Red Sea and the Gulf of Suez, in the east

The deserts are separated by the river Nile which flows from the Sudan and through the length of Egypt to the Mediterranean Sea.

The **river Nile** unequally divides the whole country into two parts.

What is the Climate like in Egypt?

Egypt is one of the hottest and sunniest countries in the world. It receives very little rain. The average temperature in the Nile Valley is over one hundred degrees Fahrenheit (38° C) from May through September. The average temperature in the region during the coldest months of the year is in the sixties (15- 20° C).

Egypt has mainly two seasons:

- a mild winter from November to April
- a hot summer from May to October.

Temperature

The average annual temperature is 20° C (69° F), reaching a high of 27° C (80° F) in the summer.

Temperatures vary widely in the inland desert areas, especially in **summer**, when they may range from 7° C (44.6° F) at night to 43° C (109° F) during the day. During **winter**, temperatures in the desert fluctuate less dramatically, but they can be as low as 0° C (32° F) at night and as high as 18° C (64.4° F) during the day.

Rainfall

Along the Mediterranean coast, they have an average annual rainfall of about 20 cm. Rainfall decreases rapidly towards the south; Cairo receives on average only 2.5 cm of rain a year, and in many desert locations it may rain only once in several years.
